請在下列句子中找出錯誤的地方，每句僅有一個錯 (每題 2 分)

31. That is an intelligent written article.
A B C D

V. Reading Comprehension 閱讀測驗 (每題 3 分)

Passage One

In seeking to solve their problems, social scientists encounter greater resistance than physical scientists. By that I do not mean to belittle the great accomplishment of physical scientists, who have been able, for example, to determine the structure of the atom without seeing it. That is tremendous achievement; yet in many ways it is not so difficult as what social scientists are expected to. The conditions under which social scientist must work would drive a physical scientist frantic. Here are five of those conditions. He can make few experiments; he cannot measure the results accurately; he cannot control the conditions surrounding the experiments; he is often expected to get quick results with slow-acting economic forces; and he must work with people, not with object.

36. According to this author, social scientists _____.
(A) make more contributions to society than physical scientists.

- (B) have solved more problems than physical scientists.
- (C) are no more important than physical scientists.
- (D) face more obstacles than physical scientists in their research.

37. A physical scientist would find the restrictions imposed upon social scientists ____.

- (E) difficult for him to manage
- (F) quite easy to cope with
- (G) similar to those in his own field
- (H) helpful to his scientific exploration

38. The discovery of the structure of the atom by physical scientists is ____.

- (I) a great feat
- (J) their greatest achievement
- (K) not so remarkable as the accomplishments of social scientists
- (L) more valuable than what social scientists have ever accomplished

39. The word 'he' in line 6 means ____.

- (M) a physical scientist
- (B) a social scientist
- (C) a critic
- (D) an anthropologist

40. In the second sentence, the word "that" after "by" refers to

- (A) resistance
- (B) the first sentence as a whole
- (C) to belittle physical scientists
- (D) the structure of the atom
